2009

Welcome to *Elite Spas*

Elite Spas hot tubs have been carefully engineered for long-term durability, efficiency and complete hydrotherapy. Throughout North America, MAAX® Spas brands have earned the trust and confidence of consumers. Rest assured, your new Elite Spas hot tub will be everything you expect – built for maximum durability and years of worry-free operation.

Complete Hydrotherapy

The principles of hydrotherapy are based on full body immersion creating buoyancy and relieving pressure, combined with heat to increase circulation. Your new Elite spa takes hydrotherapy to the next level with jetting systems engineered for a variety of therapeutic massage techniques. These systems work together to provide what we call complete hydrotherapy.

The Right Massage

Hydrotherapy is most effective when the right size and style jet is used to deliver the right pressure and massage to precise trigger points in the body. Elite's experts have worked to deliver "the right massage" through strategic jet selection and placement. You can choose from a variety of therapy systems, all powered by Elite's 56 frame pumps.

Euro Jet
Engineered for the entry point of ozone into the spa.

Standard Directional
Exact size for precise massage location.

Standard Roto
Swirling motion to avoid over stimulation. Smaller tissue groups.

Cluster Jet
Engineered for targeting exact points and close groupings.

LS Directional
A powerful, more forced massage for mid-size areas.

LS Roto
Swirling massage for mid-size areas.

XL Massage
Largest, most powerful pulsating massage.

XL Directional
A powerful, more vigorous massage for larger areas.

XL Roto
Swirling action for larger areas.

Deep Tissue Massage

When accomplished, a deep tissue massage will relieve pain and tension locked deep in the muscles and connective tissue of the body. Additional circulation, promoted by jet stimulation will release the tension and promote a healing reaction in injured parts. The deep, soothing streams of jet-propelled water from our QuadraJet System are a great example of just one of the jetting array systems by Elite, designed to loosen contracted muscles and harmonize the body's own healing reaction.

Soft Tissue Massage

In some cases, extremely tired or injured muscles need a softer touch. In this case, supportive seating combined with the direct air injection technology of AeroMAAX is the right choice. AeroMAAX strategically places air injectors throughout the spa. This gentler massage promotes blood flow and "vasellation," the awakening of smaller blood vessels through the body. The effect is mild vibration in the spa, to soothe, refresh and heal.

BackMAAX™

The ultimate massage system, BackMAAX™ features six jets strategically placed to cover the entire back region. Every jet is fully adjustable to customize your massage for the specific task at hand. BackMAAX™ is capable of a pulsating surface massage, or a penetrating, swirling motion to reach deep into your muscles. The BackMAAX™ seat is extra deep for full-body immersion, and features the most powerful massage of all the Elite hydrotherapy systems.

Foot Relief Station

Therapeutic foot massage relaxes the entire body by increasing circulation via points on the foot which correspond to all parts of the body. Strategically positioned and fully adjustable jets have been designed to target the entire foot with streams of stimulating pressure.

Neck Relief Station

Lean back into a unique cushion of comfort for everyone's favorite: a neck and shoulder massage. Tense neck and shoulder muscles are quickly relieved as positioned jets do the work for you, creating absolute bliss.

Acoustic Enjoyment
Your favorite play lists and satellite radio are just a touch away with the Sony satellite ready stereo and MP3 connection technology.

Always Within Reach
Control your music from anywhere in the spa, with just the touch of a button. Sony wireless handheld remote gives you the freedom to roam.

Sony Stereo for 3000 and 3200

Built-in Subwoofer
With Elite Spas Sony stereo/CD combination, sound resonates through the water from a subwoofer integrated into the spas substructure, allowing you to not only hear, but also feel your music.

Speakers
Perfect for an evening of relaxing, or an entire backyard gathering of friends: these innovative marine grade speakers are sure to give you superior sound quality.

ChromaTherapy

Elite Spas Chromatherapy Lighting is designed to stimulate the therapeutic effects of color combined with hot water. The Chromatherapy is produced from an array of 1" LED lights placed strategically between massage stations for optimal effect. Each color can target a specific energy center of the body, promoting balance and healing throughout.

Star Package

We don't just see colors; we feel them. They can empower us – mind, body, and soul. Whether a romantic red hue or a relaxing cool blue, the cascading colors in the new Elite Star Package sets the stage for a completely unmatched spa experience.

Cascading Water

Elite Spas' alluring waterfall feature is the ideal compliment to an already perfect setting. Another reason to drift even further - to a place where tension quickly fades away.

Clean, Clear Water

For your spa to be easy to operate and maintain, Elite Spa's Engineers created the ClearMAAX™ water management system. It is programmable to your schedule and easy to set the right temperature. The system lowers energy costs using the "Smart" control system which turns on your heater and pumps only to clean or heat.

ClearMAAX™

ClearMAAX™ is a high-rate filtration system which efficiently wraps the spa's flowing water around two specially designed filters. The results? Reduced chemical usage and fully cleaned water every 5-6 minutes. Elite Spas exclusive ClearMAAX™ utilizes 100 sq/ft filtration or optional "purification" grade filters in the cleaning process. Balanced turnover of all the spa's water is guaranteed with multiple "child safe" suction. The remarkably clean ClearMAAX™ system maintains a 5-6 minute complete spa turnover rate, regardless of whether you are using a therapy or filtration setting.

56 Frame Pump

30% larger than pumps commonly used by other spa brands, Elite Spas' 56 frame pump has many advantages. The right pump is imperative to nearly all basic functionality of spa operation. Elite Spas isolation mounted pump incorporates four shock absorbers, to absorb vibration and noise. Because of its size, the 56 frame pump has lower amp draw to reduce operating costs. High water flow combined with quiet operation. That's better performance.

Clean Zone II™

The Clean Zone II™ system combines the power of UVC light and Ozone, the same technology utilized in many communities around the world to purify drinking water. Clean Zone II™ kills 99.9%* of microorganisms, bacteria, viruses and parasites while oxidizing debris left behind. This system is the perfect blend of hygiene, purity and technology.

Clean Zone™

Clean water is the cornerstone of spa enjoyment. Elite Spas CleanZone™ water purification system will automatically maintain healthy, crystal clear water while greatly reducing chemical maintenance. CleanZone™ is an ultraviolet plasma cell ozone system that disinfects and cleans your spa water. And best of all, CleanZone™ does not require any cleaning or maintenance what so ever. Enjoy clean water throughout the life of your spa.

MAAXimum Energy Conservation

The Elite Spas insulation system ensures energy efficiency. Built like a thermal pane window, air is trapped for sound and heat insulation in addition to warm waters, and quiet operation adds to your total spa enjoyment.

Solid State Controls

The Elite Spas easy to read control panel allows you to change the temperature, adjust lighting or control your massage with the touch of a button. The reliability of these solid state controls center around gold piezo switches and marine grade construction.

Cross Section of Spa Surround

Insulating Cover

Elite Spa's deluxe insulating covers have been designed for superior heat and moisture retention. The cover's fit keeps water from evaporating while also maintaining the temperature.

BlueMAAX™

'BlueMAAX' insulation is made from recycled natural fiber, it is approved by the U.S. Green Building Council. The insulation contains no chemical irritants, is treated with a borate-based solution to prevent mold/mildew growth, pest infestation, and acts as a fire retardant. The new energy system also allows for easy service access, and can be taken out and put back together to factory specifications right in your home.

Insulock

Insulock is the ultimate in sound and heat energy management for your hot tub. All four sides, plus the floor are lined with reflective material, combined with BlueMAAX® to create an infrared thermal barrier. Radiant heat energy from the pumps and equipment reflects back to the spa and is absorbed into the plumbing. Energy created by the spa stays in the spa.

M7 Technology

This advanced, state of the art spa controller provides the ultimate in ease of use, safety and reliability for every spa user. M7 technology is a revolutionary new hardware/software platform that completely eliminates mechanical sensor switches and remote through-wall temperature sensors. The M7 platform features two identical solid state sensors that mount inside the heater manifold. These "Smart Sensors" accurately and reliably measure water temperature while monitoring critical water conditions, without the possibility of failure due to mechanical switch malfunction.

Steel Sub-Structure

The Elite Spas Steel Sub-Structure is the key feature that sets Elite Spas apart. Engineered to exact tolerances, it allows for complete integration of all the systems of the spa. The lightweight, high strength steel frame will never rot, warp, split or crack. It will never expand or contract with moisture, which over time can damage the spa's exterior. A 250% superior strength to weight ratio over conventional wood frames provides you with a lighter and stronger unit. Plus, with the addition of greater long-term corrosion protection, your sub-structure is virtually weatherproof, requiring zero maintenance.

ELITE Warranty

Steel Sub-Structure - Lifetime

Elite Spas Steel Sub-Structure is covered by a lifetime structural warranty.

- 40% lighter and 250% stronger than traditional wood frames.
- Weatherproof
- Corrosion Free

Bottom Pan

Elite Spas Bottom Pan interlocks with the steel frame, forming a superior foundation for the spa to rest on. The single piece unit locks in heat, seals out moisture and protects the spa from bugs and unwanted pests.

Brown

Grey

Mocha

DuraMaax™

Elite Spas' maintenance-free, all-weather DuraMAAX™ cabinetry is a state of the art wood-alternative material that has the look and feel of natural wood. Unlike other non-wood products, DuraMAAX™ has an incredible wood grain appearance yet it will never fade, discolor, or require staining. Offered in brown, grey or mocha, it's the only difficult decision you'll have to make.

Continuous Cast Acrylic

Every Elite Spas® hot tub has an attractive interior finish made from continuous cast acrylic. The hard, non-porous surface resists stains, fading, scratches and chemical abuse. With the look of granite, pearl or metalescence, the extremely tough finish offers beauty and peace of mind. Attractive, versatile and easy to clean - it is sure to match any backyard design
